## Your Own BBT Machine

### **Savings**

#### **For Small-Volume Manufacturers**

You no longer need to spend lakhs of rupees to purchase a PCB tester, or spend thousands every month to outsource testing.

### **Efficiency**

#### **For Large-Volume Manufacturers**

Why tie up your expensive PCB testers to test simple PCBs?

Cute cuts your backlogs in a jiffy!

### **Accuracy**

Cute detects every fault. The unique "Hot Probe" feature allows quick & easy detection of fault location

### **Speed**

Our latest "Bay Box" concept gives users the flexibility to test multiple batches simultaneously.

Cute saves time as it does not need any complex setups.

### **Advanced Features**

#### **No computer familiarity needed!**

Cute simply works with three keys! The smart master unit with display and function keys stores test data and allows the user to monitor test results & reports.

### **Zero Maintenance**

Cute demands no maintenance! It has no moving parts. It's ready when you are!

Plus, Cute is **Portable** - You can carry it in your bag while you travel. Now you can even test your PCBs at the customer's site!

And the price? It is the cutest of all!
